- Amazingly Easy to Use and much more!

Know Your Servers

Continuous monitoring enables you to learn about problems and resolve them before they become too serious. Learn about server issues at once, in real time, via email, Twitter or SMS.

Less is More

How many alerts are left unresolved because of excessive information? Anfibia Reactor is amazingly easy to use, and avoids unnecessary nagging.

Fair Conditions

Anfibia Reactor runs on your own server, meaning you have full control over private data and configuration. Try the evaluation. Pay once. No hidden fees. Support included.

Specifications

Requires a modern web browser.
Works on 32bit and 64bit systems.
1 year of support included.
In English, Spanish and Catalan.

Reviews & Comments

Reactor gets to the point. (...) It is the easiest, most convenient server monitoring tool I have tested, by far.

Jean Paul Marston, Admin

Evaluation Version

Get Reactor and evaluate it on your system. This is the full version but limited to 30 days.
